Waterproof carrying case Peli 0550

The **PELI 0550 waterproof case** is designed for professionals who need to transport and protect sensitive, bulky or heavy equipment in demanding conditions. Thanks to its generous size and robust design, this **PELI transport case** is ideal for the industrial, technical, audiovisual, logistics and institutional sectors.

This **large protective case** is a particularly appropriate solution for users looking for a **rigid, watertight case** capable of withstanding intensive use, whether on the move or storing professional equipment.

A reliable protective case for demanding environments

True to the standards of the **PELI Protector** range, the **PELI 0550** has been designed to offer a high level of protection against water, dust and the stresses of the field. It features an **O-ring seal**, **easy-opening double-turn locks** and **dual automatic pressure-balancing valves**, all of which are particularly appreciated in demanding professional applications.

A large-format case for multiple uses

The **black** PELI **0550** also stands out for its versatility. Designed to be handled by hand, moved on wheels or used in a forklift logistics environment, it meets the needs of many professionals looking for a practical and secure **large-volume transport case**.

It is available in a **foam-cushioned version** for easy cushioning and protection of equipment, or in a **foam-free version** for greater interior freedom. This flexibility enables the **PELI 0550 protective case** to be adapted to different trades, different equipment and different field constraints.

Choosing this **watertight transport case** means choosing a reliable, proven solution for intensive use. The **PELI 0550** is just as well suited to transporting technical equipment as it is to protecting professional equipment in environments where robustness is an essential criterion.

Should I choose the PELI 0550 with foam or without foam?

The version **with foam** is recommended for better wedging and securing of fragile equipment. The **foam-free** version is more suitable for professionals who wish to adapt the interior to their own needs, or make the most of the space available.

Does the Peli 0550 make it easier to transport heavy equipment?

Yes, the **Peli 0550 waterproof case** is designed for **transporting heavy or bulky equipment**. As an option, it can be fitted with a **set of swivel castors with brake**, making it considerably easier to move, particularly in industrial environments or on uneven ground.

This option improves**transport ergonomics** by limiting handling effort, while guaranteeing excellent stability during loading and storage. Combined with its **sturdy structure** and **wide handles**, the Peli 0550 becomes a **practical and durable transport solution** for professionals.
