Waterproof carrying case Peli™ 1170

Peli™ 1170 waterproof case: compact protection for sensitive equipment

The Peli**™ 1170 waterproof case** is a professional protection solution designed to secure the transport of small sensitive equipment, electronic devices or precision instruments. Part of the **Peli Protector™** range, it meets the requirements of demanding environments thanks to its robust, reliable design.

Its impact-resistant structure, combined with a **high-performance O-ring** seal, guarantees effective protection against water and dust infiltration. Its **IP67** certification ensures total dust-tightness and protection against temporary immersion.

A Peli™ case designed for professional use

The **Peli™ 1170** is equipped with an **automatic pressure-balancing valve**, to compensate for pressure variations while preventing moisture ingress. This system makes it easier to open the case after transport at altitude or in variable climatic conditions.

Its **double-action closures** ensure simple, secure handling, while its **ergonomic, overmolded handle** offers optimum carrying comfort. Stainless-steel metal components guarantee long-lasting durability, even under intensive use.

Why choose the Peli™ 1170 waterproof case?

- **Compact size** for small, sensitive equipment
- **IP67 water-** and**dust-tightness**
- **High impact resistance** for demanding environments
- **Automatic pressure relief valve** for ease of use
- Double-action**safety locks**
- **Robust design** from the Peli Protector™ range
- **Peli™ limited lifetime warranty**

Professional applications

The **Peli 1170 case** is ideal for transporting and protecting technical equipment: measuring instruments, electronic equipment, sensitive accessories or specific tools. It is ideally suited to professionals in industry, maintenance, security, audiovisual or field interventions.

Is the Peli™ 1170 waterproof?

Yes, the **Peli™ 1170** is **IP67** certified, guaranteeing complete protection against dust and resistance to temporary immersion in water.

What is the Peli™ 1170 case designed for?

Thanks to its compact size and sturdiness, it's particularly suited to transporting **small, sensitive equipment** requiring reliable protection when on the move or in storage.
