

## Peli 1400 waterproof carrying case

### **Peli™ 1400 waterproof case: reliable protection for your sensitive equipment**

The **Peli™ 1400 waterproof case** is designed to effectively protect your sensitive equipment during transport or storage in harsh conditions. Part of the **Peli Protector™** range, it meets the requirements of professionals looking for a robust, durable and reliable solution.

Thanks to its impact-resistant design and **high-performance O-ring seal**, it provides effective protection against water, dust and splashes. Its **IP67** certification guarantees total dust tightness and resistance to temporary immersion.

### **A Peli™ case designed for demanding environments**

The **Peli™ 1400EU** is equipped with an **automatic pressure-balancing valve**, allowing it to compensate for pressure variations while preventing moisture from penetrating. This system is particularly useful when transporting at altitude or in environments subject to temperature changes.

Its **double-action closures** ensure easy opening while maintaining a high level of security. Its **ergonomic handle** makes it easy to hold and carry, even in difficult conditions.

### **Why choose the Peli™ 1400 waterproof case?**

- **Ideal intermediate size** for a wide range of professional equipment
- **IP67 waterproofing** against water and dust
- **High impact resistance** for harsh environments
- **Automatic pressure relief valve** for ease of use
- **Double-action safety latches**
- **Robust design** from the Peli Protector™ range
- **Peli™ limited lifetime warranty**

### **Professional applications**

The **Peli 1400EU case** is suitable for a wide range of uses: transporting electronic equipment, measuring instruments, technical equipment or sensitive accessories. It is ideally suited to professionals in industry, maintenance, security, audiovisual or even field interventions.

## Is the Peli™ 1400 waterproof?

Yes, the **Peli™ 1400** is **IP67** certified, guaranteeing complete protection against dust and resistance to temporary immersion.

## What is the Peli™ 1400 case designed for?

Thanks to its versatile format, it can be used to safely transport **sensitive equipment** in demanding environments, providing optimum protection against shock and external elements.
