

## Rechargeable torch battery ATEX Z0 Z20 XPR-5522GMX

The **Nightstick 5522-BATT rechargeable battery** is specially designed to power portable [Nightstick XPR-5522GMX](#) lighting systems used in demanding professional environments. It's a reliable solution for guaranteeing the autonomy and continuity of use of lighting equipment dedicated to the security, industrial and technical intervention sectors.

Adapted to the constraints of the field, this battery offers **stable energy performance** and **optimized service life**, making it possible to secure operations requiring constant, high-performance lighting.

### Compatibility and use

The **Nightstick 5522-BATT** is designed for use with portable Nightstick 5522 series floodlights. It integrates perfectly with the original power supply system, guaranteeing total compatibility and risk-free use of the equipment.

It is particularly suited to the following applications

- Fire and rescue services
- Industrial maintenance
- Public works and construction sites
- Low-light environments

### Technical specifications

- **Part number:** 5522-BATT
- **Type :** rechargeable battery
- **Technology :** high-performance battery for professional use
- **Capacity:** 3.7 V - 2600 mAh
- **Compatibility:** Nightstick 5522 series floodlights
- **Use:** lighting portable professional

### Operational benefits

Use of an original Nightstick battery guarantees **optimum reliability** and a perfect match with the technical requirements of portable spotlights. It provides :

- **Controlled autonomy**

for long operations

- **Enhanced safety** thanks to certified compatibility
- **Simplified equipment maintenance**
- **Service continuity** for critical operations

## Why use an original manufacturer battery?

In professional environments, the use of non-certified compatible batteries can lead to malfunctions, loss of performance or damage to equipment. The **Nightstick 5522-BATT** ensures compliance with the manufacturer's specifications and guarantees safe, long-lasting use.

## MMF expertise at the service of professionals

MMF offers a selection of lighting equipment and accessories tailored to the requirements of professionals in the fire, industry and technical infrastructure sectors. By integrating solutions such as the **Nightstick 5522-BATT battery**, MMF assures its customers:

- Reliable, tested products
- Guaranteed compatibility with field equipment
- Technical support in the choice of solutions

This approach meets the challenges of performance, safety and durability of equipment used in real-life conditions.
