Biel Tool Paratech forcing tool

The **Biel Tool PARATECH** is a professional multi-purpose tool designed for **rescue, clearing and emergency response** operations. Developed to meet the requirements of specialized teams (USAR, firefighters, search and rescue teams), it combines robustness, versatility and efficiency in the field.

Inspired by Halligan-type tools and forcing equipment, the Biel Tool stands out for its ability to combine several essential functions in a single, compact and extremely resistant tool.

A forcing tool for demanding environments

The Biel Tool is designed to intervene in critical situations such as structural collapses, light extrication operations or forced openings. Its design enables different actions to be performed without changing tools, optimizing intervention time.

It incorporates several key functions:

- Lever and forcing tool
- Nail puller and extraction tool
- Penetration point for resistant materials
- Striking and clearing tool

This versatility makes it indispensable equipment for teams working in unstable or cluttered environments.

Biel Tool PARATECH technical specifications

- **Type:** emergency multifunction tool
- **Construction:** high-strength steel
- **Structure:** one-piece for maximum strength
- **Application:** forcing, lifting, releasing, extracting
- **Ergonomics:** optimized grip for intensive use

Its one-piece design guarantees **high mechanical strength** and durability for the most extreme conditions of use.

Operational benefits in the field

The Biel Tool enables emergency workers to be more efficient and responsive during rescue operations. By

limiting the number of tools required, it reduces clutter and improves team mobility.

- Saves time during rescue operations
- Less equipment to transport
- Versatility of use on different types of structures
- Reliability in extreme conditions (impact, mechanical stress)

Professional applications

The PARATECH Biel Tool is particularly well suited to the following sectors:

- Fire and rescue services
- Search and rescue units (USAR)
- Interventions in degraded or collapsed environments
- Civil protection and specialized teams

A professional solution distributed by MMF

MMF offers a selection of technical equipment dedicated to emergency and rescue professionals. The **PARATECH Biel Tool** is a reliable, robust solution adapted to operational constraints in the field.

To complement this tool, MMF is developing a comprehensive range of equipment for demanding environments: fire, technical rescue, industry and infrastructure. This approach enables us to offer professionals coherent, high-performance solutions that are immediately operational.

Why choose the PARATECH Biel Tool?

The Biel Tool is now recognized as a benchmark tool for rescue and clearing operations. Its robust design, versatility and ease of use make it a strategic choice for teams looking for performance and reliability.

Integrating the Biel Tool into your equipment means opting for a tool capable of responding effectively to a wide variety of emergency situations, while guaranteeing optimum durability.
