Waterproof carrying case Peli 1690

The **Peli 1690 waterproof case** is designed for situations where the transport of equipment requires **multi-operator handling**. Its different handles ensure an optimal grip for different field configurations.

It is perfectly suited to the constraints of professional environments where equipment has to be moved regularly, sometimes over long distances or in complex conditions.

A solution for heavy loads and intensive use

Designed to support **heavy loads**, the Peli 1690 is a real transport tool for professionals. Its structure absorbs the stresses of frequent movement, repeated loading and demanding environments.

Sturdy castors make it easy to move around on different surfaces, while the case's overall design ensures stability during transport.

Equipment designed for field operations

The **Peli 1690 professional waterproof case** is particularly suited to operational contexts requiring reliable logistics: technical interventions, field missions, transport of sensitive equipment or specific deployments.

It secures equipment while facilitating handling, even under intensive conditions of use.

FAQ - Peli 1690 waterproof case

Can the Peli 1690 be carried by several people?

Yes, it is equipped with **several carrying handles** for two or more people, which is particularly useful for heavy or bulky loads.

Is it suitable for intensive use in the field?

Yes, the Peli 1690 is designed for **frequent and demanding use**, with a robust structure and mobility features adapted to real-life conditions.
