Peli 1720 waterproof carrying case

A long format adapted to specific field constraints

Unlike conventional cases, the Peli **1720** has been designed to meet a specific need: to protect long equipment without having to dismantle or reposition it.

This format saves **time in the field**, while reducing the risks associated with equipment handling. This is a key advantage for professionals working with sensitive or bulky technical equipment.

Protection designed for active transport

Used on a regular basis, a long case is often subjected to greater stress: shocks, vibrations, repeated handling.

The **Peli 1720 waterproof case** incorporates a reinforced structure capable of absorbing these stresses, while maintaining a high level of protection against water and dust thanks to its **IP67 certification**.

A reliable solution for demanding professional use

Whether for field missions, transport between sites or secure storage, this **long protective case** offers a solution for environments where equipment reliability is essential.

It's designed for professionals who can't afford to compromise between **size, protection and durability**.

Frequently asked questions

When should I choose a long case like the Peli 1720?

It's particularly useful when equipment can't be dismantled or needs to remain perfectly aligned during transport. It avoids unnecessary handling and secures the equipment.

Is it suitable for frequent transport?

Yes, its sturdy design means it can be used repeatedly in demanding conditions, particularly during regular travel or field operations.
