

Peli 1770 waterproof carrying case

The **Peli 1770 waterproof case** meets the specific needs of transporting long or bulky equipment. It's designed to accommodate oversized equipment, while ensuring that it stays organized and securely in place when on the move.

It is the ideal solution when conventional formats are unable to provide adequate protection for equipment.

Protection adapted to outdoor constraints

Designed for professional use, this **carrying case** limits the exposure of contents to external elements such as **humidity, dust** or changing conditions. In this way, it helps preserve the condition of your equipment over time.

This level of protection is particularly sought-after during repeated transport or storage in harsh environments.

A format designed to optimize equipment management

Thanks to its large volume, the **Peli 1770** allows several items to be grouped together in the same space, making them easier to manage and transport. It can be easily integrated into logistical or technical contexts where equipment handling must remain simple and efficient.

It meets the needs of professionals looking for a reliable solution for the **secure transport** and **storage of bulky equipment**.

Use adapted to field constraints

Despite its size, this **large-format case** is ideal for use in the field. It allows you to move bulky equipment while maintaining a high level of safety during handling.

Its design offers a balance between capacity, protection and practicality to support professional use.

What type of equipment is this case designed for?

Suitable for **long technical equipment**, specific tools or any equipment requiring large storage space and uniform protection.

Where can I use the Peli 1770?

This model is ideal for **industrial**, **logistical** or intervention environments, where the transport of b requires a reliable and appropriate solution.
