Peli iM2075 waterproof carrying case

A waterproof case designed to secure your equipment

The Peli **iM2075 waterproof carrying case** is designed to provide optimum protection for sensitive equipment on the move. Thanks to its robust design, it provides effective protection against **shock, water and dust**, even in harsh environments.

Its compact size enables equipment to be transported in complete safety, while maintaining excellent maneuverability. This makes it ideal for professionals in the field or on the move.

Reliable design from the Storm range

Peli 's Storm range is renowned for its robustness and durability. The iM2075 benefits from resistant materials designed to absorb impacts and effectively protect its contents.

Its secure closure system and reinforced waterproofing guarantee constant protection, even in difficult conditions.

A compact format for mobile use

This **compact carrying case** stands out for its ease of handling. It's ideal for professionals who need to move their equipment frequently without constraint.

Its compact size optimizes transportation while ensuring a high level of protection for small equipment.

Applications and uses

- Transport of sensitive electronic equipment
- Protection of measuring instruments
- Technical or industrial equipment
- Field use

Why choose the Peli iM2075 case?

It offers an excellent compromise between **compactness, strength and waterproofing**. It's a reliable solution for

protecting sensitive equipment while facilitating travel.

What equipment can be carried in this case?

The iM2075 is ideal for small items requiring extra protection: electronic devices, technical tools or professional accessories.
