Peli™ RALS 9470 spotlight

RALS 9470 mobile lighting system - Powerful, ecological and versatile.

Peli's RALS 9470 is a mobile LED lighting system designed for isolated areas, combining **luminous performance, intelligent autonomy and respect for the environment**. Unlike conventional generator-based lighting solutions, this system **operates silently, with zero emissions** and **low energy consumption**, while guaranteeing an impressive lighting output of **24,000 lumens**.

Housed in a **heavy-duty** Peli **case**, the RALS 9470 is designed for **easy transport and rapid commissioning** in the field. It is particularly suited to professionals in industry, rescue, maintenance, security and construction.

Technical specifications:

- **Total light output**: 24,000 lumens (6,000 lumens per head)
- **Lighting heads**: 4 360° articulated heads
- **Telescopic masts**: 4 masts extendable to 1.80 m (6 ft.)
- **LED technology**: latest generation for maximum efficiency
- **Intelligent control**: runtime calculation, power selection (3 levels), intensity control, integrated timer
- **Power supply**:

Sealed lead-acid battery

Mains connection possible for extended operation

Low battery indicator + flashing light

- **Ports**: 12V connector with dual USB adapter
- **Transport**: Compact Peli case with retractable handle and polyurethane wheels with stainless steel bearings
- **Operation**: Quiet, environmentally friendly, reject-free
- **Standards**: **RoHS** and **CE** compliant
- **Operating temperature**: suitable for cold environments

Advantages :

- **Optimized autonomy** thanks to intelligent management system
- **Adjustable lighting** thanks to adjustable heads and intensity levels
- **Zero noise and zero emissions**, ideal for sensitive environments
- **Ready to use**: delivered complete and autonomous in a protective case
- **Always operational**: mains operation + recharging during use
- **Peripheral connection** via USB - practical when out and about
- **Easy to transport**, even in difficult terrain

Recommended use:

The **RALS 9470** mobile lighting system is designed for **professional use** in the following environments:

- **Disaster** or non-electrified**areas** (civil protection, emergency services)
- **Night-time worksites**
- **Emergency response**
- **Industrial maintenance**
- **Event security**
- **Underground work or confined spaces**

?? **Important warning**: This system contains a lead-acid battery. When recharging, it is essential to **leave the cover open** to allow gases to escape. Never recharge with the cover closed, as this may cause injury or material damage. Refer to the **instructions printed inside the case**.

Peli's **RALS 9470** is the ultimate mobile lighting solution for demanding professionals. **High-performance,**

reliable and environmentally friendly, it combines technological innovation, the legendary robustness of the Peli brand and practicality in the field. Whether for rescue operations, night work or missions in remote areas, this system offers **the autonomy, power and safety** you need.
