Peli iM2275 waterproof carrying case

A waterproof case designed for enhanced protection

The Peli **iM2275 waterproof transport case** offers a high level of protection for sensitive equipment exposed to harsh conditions. Its robust design limits impact and effectively protects contents from external aggressions such as humidity and dust.

It's a reliable solution for professionals needing to secure their equipment during frequent travels or interventions in the field.

A format adapted to equipment organization

The iM2275 is distinguished by its volume and interior structure, which makes it ideal for organizing equipment. It facilitates the storage of several items, while guaranteeing their safekeeping and protection.

This **professional transport case** is particularly suited to users wishing to optimize equipment storage without compromising safety.

A robust design from the Storm range

Designed according to the standards of **Peli**'s Storm range, the iM2275 benefits from resistant materials capable of withstanding considerable stress. It is designed to last and to accompany professionals in demanding environments.

Its secure closure system and watertight design ensure constant protection of contents, even in harsh conditions.

Applications and uses

- Transport of technical and electronic equipment
- Organization of professional equipment
- Protection of sensitive accessories
- Use in industrial or field environments

How does the Peli iM2275 case differ from more standard formats?

The iM2275 offers capacity for more structured organization of equipment. It is ideal for users who need to carry several items of equipment while maintaining a high level of protection.

What type of professional is this case designed for?

Suitable for technical, industrial or field professionals looking for a reliable solution to organize and protect their equipment on regular trips.
