

Peli iM2300 waterproof carrying case

A waterproof case for larger equipment

The **Peli iM2300 waterproof transport case** is designed to secure sensitive equipment requiring more space. Its robust design absorbs impacts and protects its contents from external aggressions such as humidity and dust.

It meets the needs of professionals transporting bulky equipment, while maintaining a high level of protection.

Optimized volume for transporting technical equipment

Thanks to its interior capacity, the iM2300 can accommodate larger or more numerous items of equipment. It facilitates the organization of equipment while ensuring a secure hold during transport.

This **professional transport case** is a reliable solution for users seeking both capacity and protection.

A robust design from the Storm range

Manufactured to **Peli Storm** standards, the iM2300 is designed to withstand demanding conditions of use. Its high-resistance materials guarantee optimum durability over time.

Its secure closure system and reinforced watertightness provide long-lasting protection for transported equipment.

Applications and uses

- Transport of bulky technical equipment
- Protection of electronic or industrial equipment
- Organization of professional equipment
- Use in field or logistics environments

Why choose the Peli iM2300 for larger equipment?

The iM2300 offers the right volume for equipment requiring more space, while maintaining a high level of protection. It allows you to transport equipment safely without compromising on sturdiness.

Where can I use this case?

The iM2300 is particularly well-suited to technical and industrial environments, or to operations requiring the transport of sensitive and bulky equipment.
