

Peli iM2306 waterproof carrying case

A waterproof case designed for demanding technical equipment

The **Peli iM2306 waterproof transport case** is designed to provide optimum protection for sensitive equipment requiring rigorous organization. Its robust design limits impact and effectively protects contents from external stresses such as humidity and dust.

It is perfectly suited to the needs of professionals transporting specific technical equipment or requiring a structured layout.

Internal organization adapted to professional needs

The iM2306 stands out for its ability to facilitate the storage and separation of equipment. It keeps each item in place, reducing the risk of damage during transport.

This **professional transport case** is particularly well suited to configurations requiring precise organization of equipment.

A robust design from the Storm range

Designed according to the standards of **Peli's** Storm range, the iM2306 benefits from resistant materials capable of withstanding intensive conditions of use. It guarantees high durability, even in harsh environments.

Its secure closure system and reinforced watertightness ensure constant protection of transported equipment.

Applications and uses

- Transport of specific technical equipment
- Organization of sensitive equipment
- Protection of electronic devices or instruments
- Use in industrial or field environments

What makes the Peli iM2306 suitable for precise organization of equipment?

The iM2306 enables equipment to be organized efficiently, limiting internal movements and improving overall protection of contents.

For what types of equipment is this case recommended?

It's ideal for equipment requiring a specific layout: technical instruments, electronic devices or sensitive professional accessories.
