

5W USB charger - Compact USB power adapter

The **ANSMANN 5W USB charger** is a compact mains adapter designed to supply and recharge USB-compatible electronic devices with ease. With its **USB-A 5V / 1A output**, it is suitable for equipment requiring moderate charging power, such as certain phones, rechargeable lamps, electronic accessories, external batteries or devices used in professional environments.

Thanks to its universal **100-240V AC - 50/60 Hz** input, this charger can be used on a variety of compatible electrical installations. Its total power of **5W** provides a stable power supply for devices suitable for this level of charging.

Technical specifications

- **Brand:** ANSMANN
- **Type:** USB mains charger
- **Output:** USB-A
- **Power:** 5W
- **Input voltage:** 100-240V AC
- **Frequency:** 50/60 Hz
- **Maximum input current:** 0.3A
- **Output voltage:** 5.0V
- **Maximum output current:** 1.0A
- **Manufacturer reference:** 1001-0108
- **Manufacturer warranty:** 3 years

A simple, reliable and versatile USB charger

This **ANSMANN 5W USB charger** is particularly well-suited to everyday recharging needs when the device doesn't require fast charging. Its compact size makes it easy to integrate into workstations, workshops, service vehicles equipped with a mains socket, or technical equipment cases.

The **USB-A 5V / 1A** output provides a stable power supply for compatible equipment, while minimizing space requirements. It's a practical solution for professionals looking for a reliable charger for electronic devices, field accessories or rechargeable equipment.

Professional applications

- Charging USB-compatible electronic accessories
- Powering small rechargeable equipment
- Workshop, office, maintenance or intervention use
- Complementary equipment for cases, technical kits or charging stations
- Daily use for devices requiring a USB 5V power supply

Why choose this ANSMANN USB charger?

The **ANSMANN** brand is renowned for its power, charging and portable energy solutions. This 5W USB charger meets essential recharging needs with a simple, robust design suitable for regular use.

CE and **UKCA** marking, compatibility with a wide range of input voltages and a 3-year manufacturer's warranty make it the right choice for users looking for a reliable, long-lasting USB mains charger.

A solution available from MMF

MMF offers this **ANSMANN 5W USB charger** to complement its range of technical equipment, electrical accessories and solutions for professionals. It fits in perfectly with the needs of industry, security, maintenance, rescue and operational environments requiring reliable accessories on a daily basis.
