Oxygen transport kit

The **oxygen medical transport kit** is designed for rescue and health professionals: firefighters, SMUR, SAMU, first-aiders and nurses. Its blue color complies with international oxygen therapy codes for immediate identification in the field. Made from **durable nylon**, it is robust and lightweight for everyday use. Its **transparent window** allows the contents to be viewed without opening, a decisive advantage in emergency situations. The **all-round zipper** ensures quick and complete access to equipment. Compact and practical, it integrates easily into any first-aid kit.

A kit designed for emergency interventions

The **Oxygen Transport Kit** is designed for the safe transport of oxygen therapy equipment in the field. Compact, robust and immediately identifiable thanks to its blue color, in line with international codes, it meets the needs of rescue and health professionals working in emergency situations.

Its **transparent window** allows immediate visual inspection of the contents without opening, while its **all-round zipper** ensures rapid and complete access to equipment in the field. Compact and lightweight, it fits neatly into any emergency kit, without weighing down the overall equipment.

A kit dedicated to transporting oxygen therapy equipment protects, organizes and provides immediate access to the equipment needed for emergency care. The **blue color**, the international color code for therapeutic oxygen, ensures instant visual identification within emergency equipment, even in difficult lighting conditions.

Technical specifications

- Material: **high-strength nylon**
- Color: **blue** - international therapeutic oxygen color code
- Window: **transparent** on top for visual identification without opening
- Closure: **all-round zipper** for total access
- Format: compact and lightweight
- Dimensions: *to be completed*
- Applications: rescue, emergency medical, oxygen therapy, field intervention

The advantages that make all the difference

The **oxygen transport kit** has been designed to meet the demands of emergency response and mobile environments:

- Immediate identification thanks to its blue color, even in poor conditions
- Visual inspection of contents without opening the transparent window
- Fast, complete access to equipment thanks to all-round zipper fastening
- Compact size for easy integration into any bag or emergency vehicle
- Robust nylon for intensive use in the field
- Optimum durability even under the most demanding conditions

Professional applications

The **Oxygen Medical Transport Kit** is particularly well-suited to professionals requiring secure transport of oxygen therapy equipment on the move:

- Firefighters and fire safety
- SMUR and SAMU teams
- First-aiders and first-aid teams
- Mobile intervention nurses

A complete range of professional equipment with MMF

MMF offers a rigorous selection of equipment dedicated to demanding environments, including transport and protection solutions for sensitive medical equipment. The aim is to guarantee professionals maximum reliability in the field and perfect adaptation to operational constraints.

To complement this kit, MMF offers a **complete range of first aid bags and kits** for the civil security, emergency medical and field intervention sectors.

Frequently asked questions

Is this medical oxygen transport kit suitable for transporting oxygen therapy equipment portable?
Yes. Its compact size and international-code-compliant blue color make it an ideal container for organizing and transporting oxygen therapy equipment during emergency interventions.

Can the contents of the kit be identified without opening it?
Yes. The transparent window on the top allows immediate visual inspection of the contents without opening the kit - a precious time-saver in the field.
