

Peli iM2500 waterproof carrying case

A waterproof case designed for cabin travel

The **Peli iM2500 waterproof carrying case** is specially designed for professionals on the move. Its cabin format means you can keep your equipment close at hand, while benefiting from optimum protection against shocks and external conditions.

It's the ideal solution for transporting sensitive equipment when traveling or on missions requiring greater mobility.

A practical format for optimized mobility

Thanks to its cabin-standard dimensions, the iM2500 facilitates travel while ensuring the safety of the equipment being transported. It avoids the constraints associated with transport in the hold, while effectively protecting its contents.

This **professional carrying case** is particularly well-suited to frequent travel.

Reliable protection in all circumstances

IP67 certified, the iM2500 provides effective protection against water, dust and shock. It is designed to withstand demanding transport conditions, whether on the move or in more demanding environments.

Its secure locking system guarantees constant protection of sensitive equipment.

Applications and uses

- Transporting equipment in the aircraft cabin
- Frequent business travel
- Protection of electronic or technical equipment
- Use in mobile environments

Why choose the Peli iM2500 for travel?

The iM2500 combines mobility, practicality and protection. It enables sensitive equipment to be carried in the cabin, while avoiding the risks associated with transporting it in the hold.

What equipment can be carried in this cabin case?

The iM2500 is ideal for transporting electronic equipment, technical tools and professional accessories requiring reliable protection when on the move.
