

Peli iM2620 waterproof carrying case

The [Peli iM2620 waterproof transport case](#) is a **rigid professional case on wheels** designed to protect sensitive equipment from shock, water and dust. Its elongated format and telescopic handle make it ideal for **transporting technical, electronic, audiovisual or industrial equipment**. This **waterproof protective case** combines high storage capacity, mobility and sturdiness for professionals on the move.

A waterproof case designed to secure sensitive equipment

The **Peli iM2620** has been developed to protect fragile or expensive equipment during transport, storage or field operations. Its rigid shell absorbs impacts and effectively protects contents from moisture, dust and demanding outdoor conditions.

This **professional carrying case** is aimed at technicians, industrialists, audiovisual service providers and users looking for a reliable solution for transporting their equipment in complete safety.

A long format for capacity and mobility

With its generous interior volume, the iM2620 is ideal for storing measuring instruments, electronic devices, IT equipment, specialized tools or photo and video equipment. Its elongated format makes it easy to organize larger items, while maintaining excellent maneuverability.

Its **sturdy wheels** and **retractable telescopic handle** ensure comfortable movement, even when the case is heavily loaded. This makes it an ideal solution for professionals who regularly transport sensitive equipment.

The renowned robustness of the Storm range

Built to **Storm** standards, this case benefits from a durable design designed to withstand intensive use. Its **HPX® resin** structure combines lightness and high impact resistance to effectively protect sensitive equipment during transport and storage.

Press & Pull™ latches ensure secure closure while remaining simple to handle. The **Vortex® valve** automatically balances internal pressure to facilitate opening after variations in altitude or temperature.

Ergonomic bi-material handles, padlockable hasps and **reinforced hinges** complete a robust and reliable design, particularly suited to industrial, technical, audiovisual and maintenance sectors.

Applications and uses

- Transport of sensitive electronic equipment
- Protection of measuring and control instruments
- Transporting technical or industrial tools
- Transport of photo and video equipment
- Secure storage of professional equipment

Questions in the field

Why choose the iM2620?

The iM2620 offers an excellent compromise between storage capacity, sturdiness and mobility. Its elongated format and wheels make it ideal for transporting sensitive equipment on frequent trips.

What kind of equipment can be carried in this case?

This case can accommodate electronic devices, technical instruments, IT equipment, specialized tools or audiovisual equipment requiring extra protection.

Is this case suitable for business travel?

Yes, its sturdy wheels, telescopic handle and watertight design make it particularly suitable for field work and regular transport.
