54 cm red LED light stick

Trafic-Control red 54 cm lighted baton: effective signalling and maximum visibility

The **Trafic-Control red 54 cm lighted baton** is a signalling device designed to provide **optimum visibility** and precise guidance in demanding professional environments. Lightweight, robust and easy to use, it's an indispensable tool for **safety, beaconing and traffic control** operations.

Thanks to its **Weatherproof LED technology**, this light stick guarantees excellent visibility, even in difficult weather conditions. It can be used to **signal danger, guide vehicles or aircraft**, and ensure the safety of operators in the field.

Technical specifications

- **Technology:** Weatherproof LEDs
- **Functions:** flashing mode and fixed mode
- **Total length:** 54 cm
- **Length light section:** 34 cm
- **Diameter**: 40 mm
- **Weight:** 183 g
- **Power supply:** 2 LR20 batteries (included)
- **Options:** wrist strap and belt clip

Operational benefits

The Trafic-Control light stick is **ergonomic** to **hold** and easy to use. Its twolighting modes enable you to tailor your signaling to your situation: enhanced visual alert in flashing mode, or continuous guidance in fixed mode.

Its robust, weather-resistant design makes it a reliable piece of equipment for intensive use in the field, particularly in low-light or reduced-visibility conditions.

Professional applications

This **glow-stick** is particularly suitable for :

- Guiding vehicles and machinery
- Beaconing hazardous areas
- Road traffic control
- Aeronautical guidance (marshalling)
- Safety and emergency response

A reliable solution for safety in the field

Designed to meet the needs of professionals, the Trafic-Control light stick guarantees **long-distance visibility** and **effective signalling**. It integrates perfectly into safety equipment used in industry, public works, logistics and emergency services.
