Reliable protection for transporting sensitive equipment

The **Peli iM2750 transport case** has been developed to secure fragile or expensive equipment during transport and storage. Its rigid shell effectively protects contents from impact, moisture and dust, even in particularly demanding environments.

This **professional transport case** is ideal for technicians, industrialists, audiovisual service providers and emergency teams who need to move sensitive equipment safely.

Deep interior volume for bulky equipment

Thanks to its taller format, the iM2750 makes it easy to organize measuring instruments, electronic devices, specialized tools, photo and video equipment or equipment requiring greater storage height.

Its **reinforced wheels** and **retractable telescopic handle** make it easy to move around, even when the case is loaded. This configuration is particularly well-suited to users transporting bulky or complex equipment.

Storm technology for protection

Manufactured to **Storm** standards, this case benefits from a durable design designed to withstand intensive use. Its **HPX® resin** structure combines lightness and high impact resistance to effectively protect sensitive equipment during transport and storage.

Press & Pull™ latches ensure secure closure while remaining simple to handle. The **Vortex® valve** automatically balances internal pressure to facilitate opening after variations in altitude or temperature.

Ergonomic bi-material handles, **padlockable hasps** and **reinforced hinges** complete a robust and reliable design, particularly suited to industrial, technical, audiovisual and maintenance sectors.

What are they used for?

- Transport of sensitive electronic equipment

- Protection of measuring and control instruments
- Transport of photo and video equipment
- Transporting technical or industrial tools
- Secure storage of bulky equipment

Frequently asked questions

Why choose the iM2750?

The iM2750 is distinguished by its deep interior volume, which is particularly well-suited to transporting equipment requiring greater storage height, while maintaining excellent mobility.

What kind of equipment can be carried in this case?

It can accommodate electronic devices, technical instruments, audiovisual equipment, specialized tools or any other sensitive, bulky equipment.

Is this case suitable for intensive use?

Yes, its robust design, waterproofing and reinforced components make it a reliable solution for professionals who regularly use their protective equipment.
