

Watertight emergency storage box for interventions and safety equipment

The **emergency storage box** is designed to ensure the protection and rapid accessibility of safety and intervention equipment in demanding environments. Robust, waterproof and easily identifiable thanks to its **international orange** finish, it is particularly suited to **heliports**, **airstrips**, industrial sites and emergency response areas.

Made from **UV-stabilized polyethylene**, this box offers excellent resistance to weather, solar radiation and extreme climatic conditions. Its automotive-grade rubber seal effectively limits water and dust infiltration to preserve stored equipment.

A box designed for emergency use

Thanks to its sturdy design and large storage capacity, this emergency box can be used to secure and protect a wide range of equipment, including fire-fighting gear, absorbents, PPE, rescue equipment and lighting accessories.

Its **two-pin toggle** locking system ensures that the lid stays securely in place, even in outdoor environments. **Stainless-steel handles** facilitate handling and movement in the field.

To meet operational requirements, **optional castors** can be added to improve the box's mobility in the field.

Key features

- Robust, watertight case in UV-stabilized polyethylene
- High-visibility international orange color
- Automotive-grade rubber gasket
- Protection against water, dust and the elements
- Resistant to extreme weather conditions
- Two toggles with safety pins
- Stainless steel carrying handles
- Customizable with color logo plate
- Optional castor kit available (consult us)

Technical specifications

Specifications	Values
Dimensions (H x W x D)	480 x 800 x 515 mm
Opening dimensions (W x D)	710 x 380 mm
Weight	10 kg
Capacity	138 liters
Quantity per pallet (Info)	12 units
Pallet dimensions (H x W x D)	2090 x 1300 x 1100 mm

Professional applications

This **watertight emergency storage box** is perfectly suited to the needs of professionals in the security, aeronautics, industry, technical services and sensitive infrastructure sectors requiring secure, immediately accessible storage of emergency equipment.

It can be used at heliports, logistics platforms, industrial sites, ATEX zones, construction sites, rescue centers, fire-fighting equipment and anti-pollution kits.

MMF: storage solutions adapted to field constraints

MMF offers a complete range of storage and protection solutions for demanding professional environments. Selected for their sturdiness and durability, the storage cases distributed by MMF meet the needs of the security, industrial and emergency response sectors.
