

## Peli iM3200 waterproof carrying case

The [Peli Storm iM3200 transport case](#) is a long protective case designed for the safe transport of technical, fragile or elongated equipment. Its format makes it possible to pack equipment that is difficult to protect in a standard case, while offering rigid protection suitable for professional travel.

Part of the **Peli Storm** range, it protects contents against shock, humidity, dust and the stresses encountered during field operations, storage or logistical transport. It is ideal for technicians, industrialists, maintenance departments, integrators and professionals who need a long, waterproof and reliable case.

### Key features

- **Protective long case**, suitable for technical or elongated equipment.
- **HPX® high-performance resin shell**, designed for demanding professional use.
- **IP67 certification**, for protection against water and dust.
- **6 Press & Pull™ latches**, for reliable, easy-to-handle closure.
- **Vortex® valve**, for automatic internal pressure balancing.
- **Integrated wheels**, convenient for moving the case when loaded.
- **Ergonomic bi-material handles** for easy handling.
- **Padlockable hasps** for added security.

### Advantages of the Peli Storm iM3200

- **Reinforced protection of sensitive equipment** during transport, storage or intervention.
- **Long format**, ideal for long equipment, specialized tools or technical accessories.
- **Easy transport** thanks to wheels and handles distributed throughout the case.
- **Secure closure** with sturdy latches and padlockable locking points.
- **Versions with or without foam**, so you can choose between immediate cushioning or customized interior fittings.

### Use

The **Peli Storm iM3200** is ideal for professionals who need to transport, store or ship long equipment with a high level of protection. In particular, it can be used for :

- transporting technical or industrial instruments ;
- protecting audiovisual, electronic or measurement equipment;
- secure storage of specialized tools;
- field interventions, maintenance operations or multi-site travel;

- shipping sensitive equipment requiring a rigid, watertight case.

Thanks to its robust design, integrated wheels and different interior configurations, the **Peli Storm iM3200** is a reliable solution for users looking for a long, mobile case adapted to professional constraints.

## FAQ - Peli Storm iM3200 suitcase

### When should I choose a long case like the Peli Storm iM3200?

A long case is recommended when the equipment to be transported is too long for a conventional suitcase, or when it requires rigid protection along its entire length. This is the case for a wide range of technical equipment, measuring instruments, audiovisual accessories or specialized tools.

### Should I choose the foam or foam-free version?

The **foam** version is ideal for fragile equipment that needs to be secured immediately. The **foam-free** versions are better suited to users who wish to create their own interior layout or carry equipment that is already protected.

### Is this case practical for frequent travel?

Yes, its integrated wheels and ergonomic handles make it easy to handle when moving around on site, loading it into a vehicle or transporting it between several locations.
