

## Peli iM3220 waterproof carrying case

### A long, deep case to protect sensitive equipment

The [Peli Storm iM3220](#) is a professional protective case designed for transporting, storing and securing long, fragile or expensive equipment. Its elongated format, deeper than some long cases, enables it to protect equipment requiring more interior volume.

Part of the **Peli Storm** range, it offers rigid protection against shock, humidity, dust and the stresses encountered during field trips, logistical transport or professional interventions. Suitable for technicians, industrialists, integrators, maintenance departments and professionals transporting sensitive or bulky equipment.

### Key features

- **Long, deep case** for technical equipment requiring greater volume.
- **HPX® high-performance resin shell**, designed for demanding professional use.
- **IP67 certification**, for protection against water and dust.
- **6 Press & Pull™ latches**, for reliable, easy-to-handle closure.
- **Vortex® valve**, for automatic internal pressure balancing.
- **Integrated wheels**, convenient for moving the case when loaded.
- **Ergonomic handles** for easy handling on site or in the workshop.
- **2 padlockable hasps** to further secure contents.

### Advantages of the Peli Storm iM3220

- **Reinforced protection of sensitive equipment** during transport, storage or intervention.
- **Generous interior volume**, useful for longer and thicker equipment.
- **Easy transport** thanks to integrated wheels and handles.
- **Secure closure** with sturdy latches and padlockable locking points.
- **Available with or without foam**, depending on the need for cushioning or interior fittings.

### Use

The **Peli Storm iM3220** is ideal for professionals who need to transport, store or ship long equipment with a reinforced interior volume. In particular, it can be used for :

- transporting bulky technical or industrial instruments ;
- protecting audiovisual, electronic or measurement equipment;

- safe storage of specialized tools;
- field interventions, maintenance operations or multi-site travel;
- shipping sensitive equipment requiring a rigid, watertight and deeper case.

Thanks to its robust design, integrated wheels and superior usable depth, the **Peli Storm iM3220** is a reliable solution for long equipment requiring more height than a standard long case.

## FAQ - Peli Storm iM3220 suitcase

### What's the difference between the Peli Storm iM3200 and iM3220?

The iM3220 is based on the principle of a long case, but with greater interior depth. It is therefore better suited to long equipment that also requires more height or cushioning volume.

### Why choose a long case with wheels for this type of equipment?

A long case quickly becomes less practical to carry by hand when loaded. Wheels make it easier to move around on site, transfer between vehicle and work area, and handle frequently in the workshop or logistics department.

### Is this case suitable for pre-assembled equipment?

Yes, the **Peli Storm iM3220** can be used to transport long pieces of equipment without having to dismantle them completely, provided their height and width remain compatible with the available interior volume.
