

Peli iM3300 waterproof carrying case

The [Peli Storm iM3300](#) is a professional protective case designed for transporting, storing or shipping long, fragile or expensive equipment. Its elongated format makes it possible to protect equipment that is difficult to pack in a standard case, while maintaining a controlled depth.

Part of the **Peli Storm** range, it offers rigid protection against shock, humidity, dust and the constraints encountered during field trips, logistical transport or professional interventions. It is designed for technicians, manufacturers, integrators, audiovisual service providers and emergency services who need to move sensitive equipment with a high level of protection.

Key features

- **Long protective case**, suitable for long technical equipment.
- **HPX™ high-performance resin shell**, designed for demanding professional use.
- **IP67 certification**, for protection against water and dust.
- **6 Press & Pull™ latches**, for reliable, easy-to-handle closure.
- **Vortex™ valve**, for automatic internal pressure balancing.
- **3 ergonomic bi-material handles**, for easy handling despite elongated format.
- **4 padlockable hasps**, to further secure contents.

Advantages of the Peli Storm iM3300

- **Long useful length**, ideal for equipment that exceeds the size of conventional cases.
- **Reinforced protection of sensitive equipment** during transport, storage or operations.
- **Long but shallow format**, suitable for elongated equipment that doesn't require a lot of headroom.
- **Secure closure** with sturdy latches and padlockable locking points.
- **Available with or without foam**, depending on the need for cushioning or interior fittings.

Use

The **Peli Storm iM3300** is ideal for professionals who need to transport or store long items with rigid, watertight protection. In particular, it can be used for :

- transporting long technical equipment ;
- protecting industrial or measuring instruments;
- moving audiovisual, electronic or specialized equipment;
- safe storage of long tools or technical accessories;
- field missions, maintenance, logistics or intervention;

- shipping sensitive equipment requiring a long, rigid case.

Thanks to its elongated format, sturdy shell and configurations with or without foam, the **Peli Storm iM3300** is a reliable solution for long equipment that needs to remain protected during business trips.

FAQ - Peli Storm iM3300 case

When should I choose the iM3300 over the iM3200?

The **Peli Storm iM3300** is more suitable when the equipment to be transported requires a greater useful length. It is suitable for equipment that is too long for an iM3200, but still makes sense if the contents are relatively thin.

Is this case suitable for long but fragile equipment?

Yes, its rigid structure, secure closure and foam versions protect long equipment that is sensitive to impact, rubbing or internal displacement during transport.

Does the long format require special handling precautions?

Yes. Even if the handles are easy to grip, you need to allow sufficient space for loading, storage and transportation, particularly in a vehicle, workshop or logistics area.
