Peli Storm iM3410 waterproof carrying case

The Peli **Storm iM3410** is a professional protective case designed for transporting, storing and securing long, fragile or expensive equipment. Its elongated format makes it possible to pack equipment that would be difficult to protect in a standard case, while retaining a robust structure suited to demanding environments.

Part of the **Peli Storm** range, it protects the contents against shock, humidity, dust and the stresses of moving around in the field. It is particularly suited to technicians, industrialists, maintenance departments, audiovisual service providers or intervention teams needing a long, rigid and reliable case.

Key features

- **Protective long case**, suitable for elongated or difficult-to-pack equipment.
- **HPX® high-performance resin shell**, designed to withstand intensive professional use.
- **IP67 certification**, for protection against water and dust.
- **5 Press & Pull™ latches**, for reliable, easy-to-handle closure.
- **Vortex® valve**, for automatic internal pressure balancing.
- **4 padlockable hasps**, to further secure contents.
- **3 ergonomic bi-material handles** for easy handling despite elongated format.
- **Available in a black version with foam**, to help cushion the material being transported.

Advantages of the Peli Storm iM3410

- **Reinforced protection for sensitive equipment** during transport, storage and field operations.
- **Long, narrow format**, ideal for equipment requiring length without unnecessary width.
- **Easy handling** thanks to handles distributed throughout the case.
- **Secure closure** with sturdy latches and padlockable locking points.
- **Suitable for demanding environments**: maintenance, industry, audiovisual, logistics, intervention or technical transport.

Use

The **Peli Storm iM3410** is ideal for professionals who need to transport or store long equipment with a high level of protection. In particular, it can be used for :

- transporting long technical or industrial instruments ;
- protecting audiovisual, electronic or measurement equipment;
- secure storage of specialized tools;
- maintenance, logistics or field operations;

- shipping sensitive equipment requiring a rigid, watertight case.

FAQ - Peli Storm iM3410 case

Why choose a long case rather than a standard one?

A long case is more suitable when the equipment to be transported cannot be properly accommodated in a conventional format. It allows you to protect elongated equipment without dismantling it or placing it in a case that's too wide.

Is the foam version useful?

Yes, the foam helps cushion the equipment and limit internal movement during transport. It is particularly useful for fragile, expensive or shock-sensitive equipment.

Is this case suitable for intensive professional use?

Yes. Its rigid shell, Press & Pull™ latches, IP67 certification and ergonomic handles make it suitable for frequent use in technical, industrial or field environments.
