

## Manikin cooper CPR canine for CPR training

**The manikin canine CPR Cooper** is a manikin veterinary training device designed for learning and practicing cardiopulmonary resuscitation techniques on dogs. It provides realistic, progressive and structured training in vital emergency techniques in veterinary medicine and animal first aid.

manikin reproduces the main stages of canine CPR: chest compressions, artificial ventilation and assessment of vital functions. It offers hands-on learning, adapted to emergency situations encountered in veterinary clinics, training centers or in the field.

Designed for intensive use in professional training, it is suitable for veterinary schools, simulation centers, veterinary clinics and animal first aid training organizations. Its system of interchangeable components enables repeated, hygienic use between training sessions.

### Training benefits

manikin enhances the quality of canine CPR training by providing real-life situations. It helps learners to develop effective reflexes in the face of vital emergencies and reinforce their mastery of essential gestures.

It promotes structured, progressive and reproducible learning, suitable for both students and animal health professionals.

### Features

- Manikin realistic, educational canine CPR training
- Simulation of chest compressions and artificial ventilation
- Assessment of vital functions: respiration and circulation
- Replaceable airways and consumables
- Robust design for intensive training use
- Quick and easy to use between training sessions
- Equipment for veterinary and animal first aid training

### Pedagogical benefits

- **Realistic training** that reproduces emergency procedures under field conditions
- **Structured learning** to support skill progression
- **Optimized hygiene** thanks to replaceable components

- **Intensive use** adapted to training centers and veterinary schools
- **Educational reliability** to reinforce the right reflexes in emergency situations
- **Effective training** thanks to repeatable sessions

## Applications

- Canine cardiopulmonary resuscitation training
- Teaching emergency procedures in veterinary schools
- Training veterinary surgeons and veterinary auxiliaries
- Simulation of emergency situations in animal first aid
- Teaching tool for animal health trainers

## FAQ
