

## Headlamp PELI™2750 LED first generation refurbished

The **reconditioned first-generation Peli 2750 LED headlamp** is designed to provide practical, reliable lighting when working, travelling or working in poorly lit areas. Its design makes it comfortable to wear and well suited to field use.

This reconditioned model is an interesting way of acquiring a professional headlamp at a reduced cost. The lamp is offered in tested operating condition, but is sold **without batteries**.

### Several lighting modes to suit your needs

The **100 lumen high** mode offers a beam range of up to **71 m**, useful for moving around, inspecting an area or working with better visibility. The **40 lumen low** mode lets you reduce light intensity when full power is not required.

The lamp also features a **flashing mode**, a **low battery warning** and a **red LED** to preserve night vision. Its **IPX4** water resistance means it can be used outdoors or in environments exposed to splashes. Available in two colors: **yellow** and **white**.

### Technical specifications

## Application

- work requiring hands-free lighting;
- maintenance, inspection or occasional work ;
- travel in poorly lit environments;
- auxiliary equipment for workshop, vehicle or intervention bag;
- outdoor use with possible exposure to splashes;
- situations requiring a red LED to preserve night vision.

## FAQ - Refurbished first-generation Peli 2750 LED headlamp

### What does "reconditioned" mean for this headlamp?

This headlamp is new, but considered **reconditioned** because the original batteries were removed before sale.

### Are batteries included with the headlamp?

No. This headlamp is sold **without batteries**. Compatible batteries must be purchased separately before use.

### What is the purpose of the red LED?

The red LED keeps the light more discreet and preserves night vision. It's useful when you're on the move, carrying out checks or carrying out work where you don't want the white light to be too bright.

### Is this lamp suitable for outdoor use?

Yes, its **IPX4** rating means it can be used in splashes or light rain. However, it remains a water-resistant lamp, not a waterproof model designed for immersion.
