

Refurbished first generation tactical torch PELI™ 2390 M6

The **reconditioned M6 2390 LED 3W OD Green** is a compact torch designed to provide reliable lighting in a rugged format. Its **Type III hard-anodized** finish and **OD Green** color make it suitable for field use, transport and intervention equipment.

This model is equipped with a **powerful 3 W LED**, with an indicative life of up to **10,000 h**. It offers a luminous flux of **61 lumens** and a runtime of around **4 h 30** with 2 x 3 V CR123A lithium batteries.

This product is offered as **reconditioned**, as the original batteries were removed before sale and the box may show some marks or be slightly damaged. The torch, on the other hand, is **brand new and undamaged**. It is sold **without batteries**, but still comes with its **Cordura case** and a pouch for spare batteries.

- for individual use or transport in an emergency bag;
- use with tactical momentary switch for rapid ignition;
- storage in Cordura case with pocket for spare batteries.

FAQ - Refurbished M6 2390 LED 3W OD Green

Why is this flashlight marked as refurbished?

This torch is marked as **reconditioned** because the original batteries were removed before sale and the box may be slightly damaged. The product itself is **new, undamaged** and offered in tested functional condition, but it is sold without batteries.

What is the advantage of the Type III hard-anodized finish?

The Type III hard-anodized finish improves the torch's surface resistance. It is useful for equipment subjected to frequent handling, rubbing or field use.

Why use a Cordura case?

The Cordura case makes it easier to protect and transport your torch. Its integrated pouch can also be used to carry spare batteries, even if batteries are not supplied with the product.
