100 L solvent cabinet - 3 adjustable shelves

The**100-liter solvent cabinet** is designed for the safe storage of flammable products, solvents and hazardous liquids used in professional environments. Compact and robust, it secures work areas while keeping sensitive products close to users.

Designed in **steel with a beige RAL 1013 epoxy paint finish**, this safety cabinet offers excellent mechanical resistance and protection adapted to the constraints encountered in workshops, laboratories, industrial sites and maintenance departments.

A compact cabinet for safe solvent storage

Flammable liquids require appropriate storage to reduce the risks of spills, flammable vapors and fires. The**100 L safety cabinet for solvents** meets these requirements, thanks to a design specially conceived for professional environments.

It features a **spill containment tank with drain plug** to contain any leaks of stored products. Its retention capacity corresponds to 100% of the volume stored, in compliance with the French decree of 02/02/1998.

Its intermediate format provides high storage capacity in a compact footprint, ideal for technical areas with limited space.

Technical specifications of the 100-liter solvent cabinet

- **Storage capacity:** 100 liters
- **Construction:** steel
- **Finish:** beige RAL 1013 epoxy paint
- **Exterior dimensions:** 1500 x 800 x 400 mm (H x W x D)

- **Interior dimensions:** 890 x 730 x 375 mm (H x W x D)
- **Interior fittings:** 3 height-adjustable shelves
- **Ventilation:** top and bottom ventilation with flame-retardant screen
- **Closing:** doors with automatic spring closing
- **Drip tray:** integrated with drain plug
- **Weight:** 80 kg

Available with or without sprinkler system CO?

The 100 L solvent cabinet is offered by MMF in several configurations to meet different levels of safety requirements:

- **Standard version:** safety cabinet without integrated sprinkler system
- **Version with CO? automatic extinguishing system:** device installed under the cabinet roof comprising thermal detection and a CO? cartridge

The version equipped with an automatic extinguishing system provides enhanced safety for sites wishing to increase the protection of storage areas containing flammable liquids.

Applications of the 100 L solvent storage cabinet

This **metal cabinet for flammable products** is ideal for professionals requiring secure, organized storage:

- Laboratories and research areas
- Industries and production units
- Paint and body shops
- Technical services and industrial maintenance
- Storage areas for flammable chemicals

MMF: a selection of equipment for industrial safety

MMF supports professionals with solutions adapted to the storage and protection of sensitive products. **Solvent cabinets, with or without automatic extinguishers**, meet the needs of companies looking for reliable, practical equipment adapted to field constraints.
