Comprehensive Plan for Containment and Transportation for Emergency Response

The **Orange Stiff Board** is a medical device designed**for immobilizing, lifting, and transporting victims** during rescue and emergency response operations. Sturdy and lightweight, it allows medical teams and rescuers to move a person safely while maintaining optimal body alignment.

Designed for intensive professional use, this **rigid rescue board** is suitable for emergency services, first-response teams, industrial sites, medical stations, and safety operations requiring reliable and rapidly deployable equipment.

A device suited for rescue operations

The rigid stretcher enables rapid care of a victim when conditions require a rigid and stable transport solution. Its design facilitates use with most **head immobilization devices** and strap systems to improve patient support during transport.

Thanks to its specific design, it does not interfere with **X-ray** systems, thereby limiting the need for additional handling of the victim during medical care.

Its buoyancy also allows it to be used as **a flotation device** during operations in wet environments or near bodies of water.

Technical specifications of the orange rigid board

- **Type:** Rigid immobilization and transport board
- **Medical device:** Class I
- **Marking:** CE
- **Color:** high-visibility orange
- **Dimensions:** 184 x 45 x 6 cm (L x W x H)
- **Weight:** 7 kg
- **Maximum load capacity:** 159 kg
- **Compatibility:** Head support and restraint straps
- **X-ray compatible:** yes
- **Use as a flotation device:** yes
- **Sterile:** no
- **Warranty:** 12 months

Advantages of the emergency hard board

- Rigid structure ensuring safe transport of the victim
- Lightweight design for easy handling by responders
- Orange color for quick identification during emergency response
- Compatible with most immobilization accessories
- Suitable for use in various emergency settings
- No interference with X-ray equipment

Professional Applications

This **orange medical hard board** meets the needs of professionals working in situations requiring rapid and safe care:

- Emergency and rescue services
- Medical teams and first responders
- Event medical stations
- Industrial sites and internal security teams
- First aid training and operational drills

Packaging and logistics information

- **Packaged dimensions:** 188 x 46 x 7 cm
- **Packaged weight:** 9 kg

MMF: emergency equipment and professional solutions

MMF offers a selection**of equipment designed for professionals in rescue, security, and emergency response**. The solutions provided meet on-site requirements by prioritizing reliability, ease of use, and user safety.

This hard orange stretcher is part of a comprehensive range of victim care equipment, designed to meet the operational demands of rescue teams and challenging professional environments.
