

## 12V DC power cord for professional rechargeable lights

### 12V DC Power Cord for Professional Rechargeable Lighting

The **12V DC power cord** allows you to power and recharge compatible professional lighting directly from a 12-volt power source. Designed for mobile use, it ensures a reliable connection to keep lighting equipment operational during field operations.

This accessory is particularly well-suited for professionals seeking an on-board charging solution for a service vehicle, a mobile workshop, or any environment equipped with a continuous 12V DC power supply.

### A reliable 12V power supply for your lighting equipment

This power cable features a straight **barrel plug** on the equipment side and a standard **12V DC** adapter on the power supply side.

Its rugged design with **18 AWG** cable ensures a stable and durable power supply, suitable for the demands of intensive use in demanding professional environments.

### Professional applications

The 12V DC power cord is designed to support users of both plug- portable, and rechargeable lighting in a wide range of sectors:

- Fire and emergency services
- Security and field operations
- Industrial maintenance
- Technical vehicles and mobile workshops
- Work in remote areas requiring a mobile charging solution
