Blue Quick-Release Tourniquet Clip - Holtex

A Convenient Clip-On Tourniquet for Medical Care and Specimen Collection

The **blue quick-release clip tourniquet—Holtex D—is** a medical accessory designed to facilitate the application of a tourniquet during patient care, examinations, specimen collection, or training procedures. Its design allows for easy **one-handed** operation, including **tightening, loosening, and opening the buckle**.

It is intended for healthcare professionals, nurses, first responders, healthcare facilities, medical offices, and training centers looking for a simple, reliable, and quick-to-use tourniquet.

Quick opening and gradual release

Thanks to its **ABS clip closure** system, this tourniquet allows for quick application and release. The **gradual release** makes it easy to adjust the compression as needed, while maintaining controlled handling.

Its **elastic polyamide strap** enhances comfort during application. It is designed for use in routine medical procedures while minimizing discomfort caused by compression.

A durable tourniquet for intensive use

The **Holtex blue clip tourniquet** is designed to withstand regular use. Its construction and design ensure a **long service life**, even with intensive use.

Measuring **45 cm** in length and extendable up to **73 cm**, it fits easily into a first-aid kit, an emergency bag, a doctor’s office, or educational supplies.

Frequently Asked Questions

Is the tightness adjustable?

Yes, this model allows for **gradual loosening** to adjust the compression as needed.

Is this tourniquet suitable for repeated use?

Yes, its **elastic polyamide** strap and **ABS** clasp are designed for regular use, including in medical or training settings.
