Replacement Kit for Cricothyroidotomy Simulator

The **replacement kit for the cricothyroidotomy simulator is** designed to replace the consumables used during cricothyroidotomy training sessions. It helps keep the simulator in good working order after multiple practical exercises.

This kit includes **3 skins**, **3 adult inserts**, and **3 pediatric inserts**. It thus allows for the organization of multiple training sessions while ensuring that the simulation areas remain appropriate for the procedures being practiced.

It is intended exclusively for the discontinued Life/form® cricothyroidotomy simulator. Compatibility must therefore be verified before ordering.

Technical Specifications

FAQ – Replacement Kit for Cricothyroidotomy Simulator

What is this replacement kit used for?

This kit is used to replace the consumable parts used during cricothyroidotomy exercises. It allows training to continue when the simulator’s skin or inserts are worn out.

Which simulator is this kit compatible with?

This kit is compatible only with the cricothyroidotomy simulator. Be sure to check the simulator’s part number before ordering.

Does this kit allow for multiple training sessions?

Yes. The skins and inserts provided allow you to refresh the training areas for multiple exercises, depending on the frequency of use and the training protocols followed.
