# 1400PF Turntable Mount for Peli 1400 Waterproof Carrying Case

## Peli™ 1400PF Panel Mount for the Peli 1400 Transport Case

The Peli™**1400PF Panel Mount**, also known as a panel frame, is designed to allow the integration of an interface panel into the **Peli 1400 Protector case**. It is intended for professionals who wish to transform their case into a mobile technical solution, service kit, diagnostic case, or integration enclosure for electronic equipment.

This frame allows a user-supplied panel to be mounted inside the case to integrate connectors, controls, displays, interfaces, or components according to project requirements. It offers a practical solution for adapting a Peli™ case to specific uses without compromising its role in protecting the equipment inside.

## A Mounting Frame for Technical Applications

The **Peli™ 1400PF panel frame** facilitates the installation of a circuit board or interface panel inside the case. This configuration is particularly useful for applications requiring direct access to controls or connections, while keeping the equipment portable and protected.

Thanks to **the O-ring** included in the kit, the panel can be mounted securely to help maintain the case's watertight seal, even when the lid is open. The circuit board mount is therefore an ideal solution for professional environments where reliability, modularity, and equipment protection are essential.

## A complete kit for customizing the Peli™ 1400EU case

The **Peli™ 1400PF** kit includes the components needed to assemble the frame: a panel frame, an O-ring, inserts, and self-tapping screws. It is specifically designed for **the Peli™ 1400EU Protector Case**.

This circuit board mount allows you to take advantage of the Peli™ case's ruggedness while adapting it to more advanced integration needs: control, measurement, power supply, connectivity, testing, or field service.

### Which case is this circuit board mount compatible with?

The **Peli™ 1400PF circuit board mount** is compatible with the **Peli™ 1400EU Protector Case**.

## What is a Peli™ case panel frame used for?

A panel frame allows you to integrate a circuit board or interface panel into a Peli™ case. It can be used to install connectors, controls, displays, or other technical components depending on the intended application.

## What's included in the Peli™ 1400PF kit?

The kit includes **1 panel frame**, **1 O-ring**, **10 inserts**, and **4 self-tapping screws**.
