FAQ – Replacement Head for the KERi manikin

What is this replacement head used for?

It is used to replace the head of a KERi “ manikin ” used in nursing training, in order to keep the “ manikin ” in working condition for educational purposes.

Does this part replace the entire KERi manikin?

No. It is only a **replacement head**. It allows you to replace this part of the manikin without replacing the entire unit.

In what situations should this replacement part be used?

It is useful when a KERi “ manikin ” is used regularly in training and the original head needs to be replaced to maintain a clean, functional, and presentable teaching aid.
