FAQ – Replacement Head for the GERi man manikin

Why replace only the head of the GERi man manikin?

Replacing the head extends the GERi nursing manikin’ manikin ’s lifespan without having to replace the entire unit. This is useful when this part is worn out, damaged, or no longer presentable after repeated training sessions.

Is this head compatible with all nursing-care " manikins "?

No. This part is designed for the compatible **GERi** “ manikin.”

Does this part allow a GERi- manikin to be restored to training condition?

Yes, if only the head needs to be replaced. It allows you to maintain a clean and functional teaching aid for nursing, basic care, and patient simulation training.
