

Manikin Kim's Neonatal CPR

The **Kim Neonatal CPR manikin** is a training aid designed to teach cardiopulmonary resuscitation (CPR) techniques for infants. It allows learners to practice ventilation and compression techniques in an educational setting suitable for first aid, emergency response, pediatric care, or medical simulation training.

Its one-piece, **latex-free foam** body offers a sturdy, lightweight, and durable design. The removable face masks and replaceable airways facilitate the organization of repeated training sessions while helping to minimize the risk of cross-contamination between users.

manikin comes with a **carrying case**, **3 face pieces**, **3 airways**, and an instruction manual. Replacement face pieces are available separately in packs of 10, and replacement airways in packs of 24.
