2 kg ABC Dry Powder Fire Extinguisher - Set of 6

This **set of 6 2-kg ABC dry-chemical fire extinguishers with constant pressure** is an ideal solution for equipping multiple premises or vehicles with reliable first-response equipment that complies with regulatory requirements. Designed for professional environments, these fire extinguishers effectively combat fires involving solids, flammable liquids, and gases.

Thanks to their **ABC dry chemical extinguishing agent**, they offer great versatility and are suitable for businesses, workshops, warehouses, public facilities, retail stores, emergency response vehicles, and construction sites.

Why choose an ABC dry chemical fire extinguisher?

The ABC dry chemical fire extinguisher is the most versatile model for fire protection. It allows for rapid response to **Class A** fires (wood, paper, cardboard, textiles), **Class B fires** (gasoline, solvents, hydrocarbons, paints), and **Class C** fires (flammable gases).

This versatility makes it the preferred choice for facilities where multiple types of fire hazards are present. It is particularly recommended for workshops, storage areas, utility rooms, parking garages, commercial vehicles, and industrial sites.

Permanently pressurized technology

Each fire extinguisher is equipped with a **permanent pressure** system, ensuring immediate availability in an emergency. A **pressure gauge** allows you to quickly verify that the unit is properly pressurized.

The steel cylinder, combined with a nickel-plated brass head, ensures excellent mechanical strength and long-term reliability.

Technical Specifications

- **Type:** permanently pressurized fire extinguisher
- **Extinguishing agent:** ABC dry chemical
- **Charge:** 2 kg
- **Packaging:** set of 6 fire extinguishers

- **Propellant:** nitrogen at 15 bar
- **Operating weight:** 3.85 kg
- **Dimensions:** height 380 mm - diameter 110 mm
- **Fire class:** ABC
- **Extinguishing capacity:** 13A - 89B - C
- **Operating temperature:** -30°C to +60°C
- **Compliance:** NF EN3-7 + A1
- **Wall mount:** included

An ideal solution for equipping multiple locations

The **6-pack of fire extinguishers** makes it easy to equip multiple buildings, workshops, offices, or vehicles while ensuring consistency across the fire safety inventory.

Each fire extinguisher comes with its own wall mount to facilitate installation in accordance with fire safety recommendations.

Areas of Application

- Businesses and commercial buildings
- Maintenance workshops
- Logistics warehouses
- Retail stores and public buildings
- Parking garages and utility rooms
- Industrial facilities
- Commercial and emergency vehicles
- Construction sites

MMF: Your Fire Protection Equipment Specialist

MMF assists professionals in selecting their firefighting equipment with a range of products that comply with current standards. Our line of fire extinguishers meets the needs of businesses, local governments, industrial companies, and technical services seeking reliable, high-performance, and immediately operational solutions.
