Leg Injection Pad for Geri/Keri- manikin

The **GERi/KERi leg injection pad for the “ manikin ”** is designed to replace a worn-out injection area on a compatible nursing care “ manikin.” It keeps the “ manikin ” in working condition for nursing skills training exercises.

manikinThis part is useful in training centers where nursing manikins are used regularly. Replacing the cushion extends the service life of the training equipment without having to replace the entir manikins.

Maintaining a Functional Training Area

During repeated sessions, injection sites may lose their realism or become damaged from needle use. The replacement pad restores a surface suitable for learning the procedure, positioning the needle, and supervised practice of injection techniques.

It is part of a medical simulation equipment maintenance program, which is particularly important for healthcare schools, training institutes, hospitals, and organizations that provide training in technical procedures.

Technical Specifications

	Replacement injection pad
	Manikin Nursing care
	Leg of the manikin
	Manikins GERi/KERi compatible
	Replacement of a worn or damaged injection zone

Usage	Training in injection techniques on manikin
Target Audience	Nursing schools, training centers, medical simulation organizations, healthcare facilities

Usage

- Replacement of a worn-out injection pad;
- maintenance of an existing GERi/KERi manikin;
- training in injection techniques;
- practical nursing exercises;
- use in a training room or medical simulation lab.

FAQ – Injection Pad for the GERi/KERi " manikin " Leg

When should the injection pad be replaced?

Replacement is recommended when the injection site is marked, excessively worn, or no longer allows for satisfactory practice of the procedure. This is common on manikins s used regularly in training.

Does this pad prevent the need to replace the entire manikin?

Yes. It is a **replacement part** that restores the injection site on the leg without requiring replacement of the entire nursing manikin.

Is this cushion compatible with all nursing care manikins s?

No. It is designed for **compatible GERi/KERi-** manikins . Before ordering, it is best to verify the exact model of the manikin to avoid any compatibility issues.

Why should training centers have this type of replacement part on hand?

In a training center, the injection sites are subject to heavy use. Having a replacement cushion on hand helps minimize downtime for the manikin and ensures the quality of practical exercises.
