Carrying Case for a 149-cm Tripod

Tripod carrying cases are designed to store, protect, and transport a compatible lighting stand. They are ideal for users who regularly transport their equipment between multiple locations, rooms, job sites, events, or work areas.

Two models are available to accommodate different tripod sizes and provide the desired level of protection. The **standard case** prioritizes light weight and shoulder carry thanks to its shoulder strap. The **padded case** offers superior protection against friction, scratches, and minor impacts thanks to its **10 mm** padding.

Two covers to suit different tripod sizes

The **standard tripod case** has an interior length of **125 cm** and an interior diameter of **15 cm**. It is suitable for lighting tripods whose folded dimensions fit within this size. It is particularly well-suited for everyday transport and light storage.

The **padded tripod bag** offers a longer design, with interior dimensions of **1480 x 160 x 140 mm**. Its **nylon** construction, **10 mm padding**, double zipper, and **water-repellent** finish provide additional protection during regular travel.

Transport, Storage, and Equipment Protection

These cases help minimize friction, dirt, and minor impacts associated with everyday transport. They also make it easier to store the tripod neatly between uses, particularly in a vehicle, workshop, equipment room, or storage area.

Before choosing a model, it’s important to compare the dimensions of the folded tripod with the interior dimensions of the case. The standard model is suitable for shorter, lighter tripods, while the padded model is better suited for longer tripods or those requiring enhanced protection.

Technical Specifications

	Tripod carrying case	Padded tripod carrying case
	Transporting and storing a compatible tripod	Transport and storage of a lightweight tripod or compatible stand

Color	Black	Black
Material	Not specified	Nylon
Padding	No	Yes, 10 mm
Protection	Everyday transport, friction, and dirt	Abrasion, minor impacts, and light moisture
Internal length	1250 mm	1,480 mm
Interior dimensions	1250 x 150 x 150 mm	1,480 x 160 x 140 mm
External dimensions	1250 x 150 x 150 mm	1,490 x 170 x 150 mm
Inner diameter	15 cm	Not specified
Closure	Drawstring	Double zipper
Shoulder strap	Yes	No
Water-repellent finish	Not specified	Yes
Interior design	No interior features listed	No interior layout specified
Weight	0.4 kg	1 kg

Usage

- transporting a tripod for a lighting ball or compatible stand;
- storing a lighting stand between uses;
- protection against friction, dirt, and minor impacts;
- transportation to construction sites, events, workshops, or temporary installations;
- proper storage of equipment in a vehicle or utility room.

FAQ – Tripod Carrying Cases

How do I choose between the two models?

The choice depends mainly on the dimensions of the folded tripod and the level of protection required. The standard case is suitable for tripods up to **125 cm** for regular transport. The padded case is suitable for longer tripods, up to **148 cm**, and offers better protection thanks to its **10 mm** padding.

Is the standard case more practical for frequent travel?

Yes, if the tripod fits within its dimensions. Its light weight of **0.4 kg** and **shoulder strap** make it easy to carry over the shoulder during short or regular trips.

Does the padded case provide better protection for the tripod?

Yes. The **10 mm padding** provides additional protection against friction, scratches, and minor impacts associated with everyday transport.

Does the water-repellent finish make the case waterproof?

No. The water-repellent finish on the padded case protects against light moisture and occasional splashes. It should not be considered waterproof protection in the event of prolonged exposure to rain.
