

Carrying Case for a 149-cm Tripod

The **padded tripod carrying case** is designed for storing and transporting a lightweight tripod or compatible stand. It protects your equipment during travel, storage, or temporary setups.

Its **nylon** construction with **10 mm padding** minimizes friction, scratches, and minor impacts associated with everyday transport. It is ideal for users who regularly transport their equipment to job sites, events, service calls, technical installations, or outdoor assignments.

Long Format for Large, Folded Tripods

With interior dimensions of **1480 x 160 x 140 mm**, this bag is sized to accommodate long tripods when folded. Before use, it is important to compare the dimensions of the folded tripod with the available space inside the bag.

The **double zipper** makes it easy to open the cover and place the tripod inside. The **water-repellent** finish provides additional protection against light moisture, splashes, and typical transport conditions. This model **does not** include a **shoulder strap**.

Technical Specifications

	Lightweight Tripod Carrying Case
	Transport and storage of a compatible tripod
	For 1 compatible tripod leg
	Nylon
	Yes, 10 mm
	Double zipper
	Water-repellent
	No interior features listed
	No

Usage

- Carrying a compatible tripod;
- storing a lightweight tripod or compatible mount;
- protection against friction and minor impacts;
- transport to construction sites, events, service calls, or temporary installations;
- proper storage of the stand between uses.

FAQ – Padded Carrying Case for Large Tripods

How can I check if my tripod is compatible with this case?

Compare the dimensions of the folded tripod with the interior dimensions of the case: **1480 x 160 x 140 mm**. If the folded tripod exceeds these dimensions, the case will not fit.

Does this case provide better protection than a simple, non-padded case?

Yes. The **10 mm padding** provides extra protection against minor impacts, friction, and everyday handling during transport.

Is the case designed to be carried over the shoulder?

No. This model is designed **without a shoulder strap**. It is therefore best suited for carrying by hand or for storing the tripod, depending on the weight and bulk of the equipment inside.

Does the water-repellent finish allow for use in the rain?

The water-repellent finish protects against light moisture and occasional splashes. It should not be considered waterproof protection for prolonged exposure to rain or water.
