

## 20-liter first aid kit

The **20-liter small-size emergency bag** is designed to carry response, first aid, or emergency medical supplies. Its compact size makes it easy to transport and ideal for rapid response operations, emergency vehicles, field teams, or mobile medical stations.

Its design features a **1100 dtex Cordura®** exterior, a **300D nylon** interior **with a PVC coating**, **YKK®** zippers , and **Reflexite®** reflective strips . These features provide good durability for everyday use while enhancing the bag's visibility during operations.

### A compact bag for organizing emergency supplies

The bag is divided into two separate compartments, with a semi-rigid lower section and an upper section that opens from the inside. The interior features elastic straps to organize the equipment and minimize movement during transport.

Transparent exterior pockets allow for quick identification of the bag or its contents. Carrying is made easier by the hand grips and shoulder strap, depending on the preferred carrying method.
