

30- or 40-liter first aid kit

The **30- or 40-liter trauma bag** is designed to carry first aid, emergency care, or response equipment. Its padded design protects the contents from friction and minor impacts during transport, storage, or routine handling.

Two models are available, depending on the volume of equipment to be carried. The **30-liter** model is suitable for moderate needs, offering a compact and portable organization. The **40-liter** model offers greater capacity, suitable for teams requiring more compartments and available space.

Two sizes depending on the volume of equipment

The **30-liter medium-sized trauma bag** features **4 exterior pockets**, a **removable interior kit** with a transparent window, and **4 interior compartments** with movable dividers. It allows for clear organization of equipment while maintaining an easily transportable size.

The **40 L high-capacity trauma bag** features **5 exterior pockets**, **2 removable interior pouches** in different colors with transparent windows, and **6 interior compartments** with movable dividers. It is suitable for more comprehensive setups or when larger carrying capacity is required.

Robust design for emergency response

Both bags are constructed with a **Cordura® 1100 dtex** exterior and a **300D nylon** interior **with a PVC coating**. **YKK®** zippers and **Reflexite®** reflective strips enhance the bag's performance and visibility during emergency response.

Carrying is made easier by the **handles** and **shoulder strap**. The interior compartments and removable pouches allow you to organize your equipment, identify it more easily, and access it more quickly.
