

Mini- handheld nozzle s for curbside fires and decontamination

The **19-mm copper mini- handheld nozzle e for edge fires and decontamination** is designed for operations requiring simple, compact, and easy-to-handle equipment. It is suitable for watering, rinsing, localized cooling, light decontamination, or treating a brush fire.

Its **3/4" - 19 mm** size, similar to [a](#) garden hose, allows for quick deployment on a compatible small-diameter line. The **built-in valve** lets you open or close the water supply directly at the handheld nozzle, without having to return to the water source.

A compact mini- handheld nozzle with a straight or spray spray pattern

This copper handheld nozzle allows you to work with **a straight stream** for more targeted action, or with **a spray stream** for watering, rinsing, or moistening an area. It can be used as a supplement to a larger firefighting system, particularly for finishing touches, edge work, or cleanup after an operation.

Its compact size makes it easy to store in a vehicle, a response bag, or a kit dedicated to outdoor operations.

Technical Specifications

	Mini 19 mm copper edge- handheld nozzle r for edge fires and decontamination
	19 mm
	3/4"

- preventive spraying or wetting of an area;
- Rinsing equipment after an operation;
- light decontamination or local cleaning;
- Localized cooling;
- use on a compatible small-diameter hose line.

FAQ – 19 mm Copper Mini- handheld nozzle

What types of spray patterns are available?

The handheld nozzle can be used with **a straight stream** or **a spray**, depending on the need: targeted action, rinsing, watering, or humidifying an area.

Is the valve built into the handheld nozzle?

Yes. The valve allows you to control the opening and closing of the water supply directly at the handheld nozzle.

Is this a standard fire hose handheld nozzle?

No. This is a **3/4" - 19 mm** mini- handheld nozzle, designed for use with a garden hose. You must verify the compatibility of the connection before use.
