

Scotty 9-in-1 Multifunction Emergency Tool

The **Scotty All-in-One Rescue Wrench** is a **multifunction tool designed for firefighters, rescue teams, and emergency response units**. Compact and versatile, it combines several useful functions into a single tool for firefighting, roadside assistance, and emergency safety operations.

In particular, it can be used to tighten or loosen certain hose couplings, operate gas valves, access a vehicle's battery, break a window, cut a seatbelt, or handle an oxygen cylinder portable. This all-in-one design reduces the number of individual tools that need to be carried during an operation.

A Multifunctional Tool for Emergency Response

During an emergency response, quick access to the right tool can be critical. The Scotty Rescue Wrench combines several functions commonly used by rescue teams into a single, easy-to-carry and easy-to-use tool.

It can thus be used in firefighting operations, roadside rescue, light extrication, or securing a site before intervention.

Wrench for fire hose couplings from 25 to 76 mm

The tool features a **spanner wrench function for couplings ranging from 1 to 3 inches, or approximately 25 to 76 mm**. It allows responders to quickly tighten or loosen certain hose couplings used during firefighting operations.

Wrenches for Residential and Commercial Gas Valves

The Rescue Wrench also includes functions for operating **residential and commercial gas valves**. These can be used during an emergency response requiring the rapid shut-off of a gas supply to reduce the risk of fueling a fire or exacerbating an incident.

8-mm and 10-mm Battery Terminal Wrenches

Two wrench sizes are built in for working on battery terminals: **8 mm and 10 mm**. They allow emergency

responders to quickly access the connections of many automotive battery systems to help de-energize the vehicle.

Carbide-tipped glass breaker

A **carbide tip designed for breaking glass** is integrated into the tool. This feature can facilitate rapid access to a vehicle's passenger compartment when response conditions require breaking a window compatible with this type of tool.

Seatbelt cutter with replaceable blade

The tool also features a **seatbelt cutter with a replaceable blade**, which is particularly useful during roadside rescue operations involving occupants trapped by their seatbelts.

Integrated pry bar

A **pry bar** completes the tool's various functions. The manufacturer notes that it can be used for certain extrication operations, such as removing a wheel cover to access the wheel nuts.

Oxygen Cylinder Wrench

The Rescue Wrench is equipped with an **O2 cylinder wrench**, allowing for the quick opening of compatible portable oxygen cylinders during medical rescue operations or victim assistance.

- **Type:** Multifunction emergency wrench
- **Brand:** Scotty Firefighter
- **Users:** firefighters, rescue teams, and emergency response units
- **Valve sizes:** 1 to 3 inches / 25 to 76 mm
- **Gas valves:** wrenches for residential and commercial installations
- **Glass breaker:** carbide tip
- **Seatbelt cutter:** replaceable blade
- **Socket wrenches:** 8 mm and 10 mm
- **Oxygen cylinder function:** built-in O2 wrench
- **Lever function:** built-in lever wedge
- **Body:** technical-grade nylon
- **Mounts:** stainless steel
- **Handle:** ergonomic design for a comfortable grip

Professional applications

- County fire and rescue departments
- Emergency response centers
- Fire trucks
- Roadside assistance
- Traffic Accident Response
- Technical Rescue Units
- First-Response Teams
- Industrial safety services

The Benefits of the Scotty Rescue Wrench

- Multiple tools combined into a single piece of equipment
- Designed for firefighting and rescue operations
- Functions for hoses, gas, batteries, and roadside assistance
- Built-in window breaker and seatbelt cutter
- Oxygen cylinder wrench portable
- Made of technical-grade nylon
- Stainless steel fasteners
- Versatile design for use in a vehicle or emergency response bag

MMF, a specialist in equipment for firefighters and emergency responders

MMF offers a selection of technical equipment designed for **firefighters, emergency services, industries, and security teams**. The Scotty All-in-One Rescue Wrench effectively complements the equipment in a vehicle or emergency response bag by combining several useful functions into a single compact tool.
