

## Split-leather case for a 50-cm Monseigneur pliers

The **split-leather case for the 50-cm Monseigneur pliers** is designed to store, secure, and transport a pair of Monseigneur pliers during emergency response, fire safety, or maintenance operations. Its elongated shape accommodates the tool while keeping it securely in place thanks to several built-in fastening systems.

Made of **split leather**, this case offers a sturdy solution suitable for professional use. Its design combines a protective shell, metal reinforcements, and several straps with buckles to secure the tool during transport and facilitate its integration into emergency response gear.

### A case specifically designed for a 50 cm Monseigneur plier

The Monseigneur pliers are a tool commonly used for opening, prying, extrication, or controlled forced entry operations. Transporting them requires a retention system that protects the tool while preventing it from hindering the user's movements.

This **case for the 50 cm Monseigneur pliers** allows the tool to be stored in a dedicated holder, while maintaining easy access for operations requiring rapid deployment.

### Made of split leather with reinforcements

The case is made of **yellow split leather**, with visible perimeter stitching that holds the entire assembly together. Metal components are integrated into the structure to reinforce areas subject to mechanical stress and improve the case's durability over time.

Several rivets and attachment points also reinforce the structure, particularly at the ends and along the retaining straps.

### Adjustable Straps and Secure Tool Retention

The holster features several **retention straps equipped with metal buckles**. These systems allow you to adjust the tightness around the Monseigneur pliers and limit the tool's movement while on the move.

A long perimeter strap is also visible on the case, complementing the retention system and making it easier to adapt the case to its operational use.

## Features of the split-leather holster

- **Type:** Carrying and storage case for Monseigneur pliers
- **Compatibility:** 50 cm Monseigneur pliers
- **Main material:** split leather
- **Color:** yellow
- **Construction:** reinforced long case
- **Construction:** Perimeter stitching and rivets
- **Reinforcements:** integrated metal components
- **Fit:** adjustable straps
- **Closure:** metal buckles
- **Use:** transport, storage, and protection of a 50 cm Monseigneur plier

## Professional applications

- Fire and emergency services
- Security teams
- Extrication and rescue operations
- Industrial maintenance
- Technical Services
- Emergency Vehicle Equipment
- Local Governments
- Industrial sites

## Benefits of the 50 cm Monseigneur Pliers Case

- Holster designed for a 50 cm Monseigneur pliers
- Sturdy split-leather construction
- Adjustable straps
- Durable metal buckles
- Metal reinforcements in high-stress areas
- Securely holds the tool during transport
- Makes it easy to store in a vehicle or emergency response equipment
- Keeps the pliers within easy reach

## A storage accessory for emergency response tools

A dedicated case keeps the **50 cm Monseigneur pliers** properly positioned and protected when not in use. It also helps organize tools inside an emergency vehicle or within emergency response equipment.

The combination of split leather, metal reinforcements, and adjustable straps offers a simple and sturdy solution for professionals who regularly use this type of tool.

## MMF, a specialist in emergency response equipment and accessories
