

Rechargeable Swivel Lamp for Peli Cases

The [Peli rechargeable swivel suitcase lamp](#) is a professional-grade light designed to be mounted on a compatible protective case and make it easier to work in low-light environments. It illuminates the contents of a case, a prep area, sensitive equipment, or a mobile workspace without requiring you to hold a lamp in your hand.

Its compact and discreet design allows for seamless integration into the case without obstructing access to the equipment. Installation is tool-free thanks to a pre-applied double-sided adhesive strip. The swivel light head allows you to direct the beam toward the inside of the case or toward a nearby work area.

A Built-in Light for Protective Cases

The ModLight Pivot is designed for professionals who use their cases as mobile workstations: technicians, field teams, photographers, videographers, maintenance crews, emergency response teams, or users who need reliable lighting directly integrated with their equipment.

It is compatible with most **Air**, **Protector**, and **Storm** case lines. Its design also allows for integration with **EZ-Click MOLLE** panels without hindering their installation or removal.

Multimode lighting: white, red, or blue

The light features a multi-mode control that allows you to choose between **white**, **red**, or **blue** light. These different modes let you adapt the lighting to the task at hand: main lighting, glare reduction, locating equipment, or working in low-light conditions.

The removable magnetic head allows you to quickly detach the light for recharging or to use it separately if needed. This design makes the lighting more versatile than a simple fixed light built into the case lid.

Technical Specifications

	Rechargeable Swivel Case Light

Light Source	LED
High luminous flux	140 lumens
Low luminous flux	46 lumens
Battery life (high)	2 hours 47 minutes
Low runtime	18 h

Usage

- Interior lighting for a protective case;
- preparing equipment in low-light environments;
- field work, maintenance, inspection, or mobile installation;
- organizing photography, video, technical, or emergency equipment;
- spot lighting around a case or a mobile workstation;
- standalone use thanks to the removable magnetic head.

FAQ – Rechargeable Lamp for Peli Cases

What is this light used for?

It provides rechargeable, adjustable, hands-free lighting for a compatible case. It illuminates the contents of the case or a nearby work area.

Is the light rechargeable?

Yes. It runs on a **rechargeable lithium-ion** battery, which is included with the light.

Do I need to drill holes in the case to install it?

No. It attaches tool-free using **pre-applied double-sided adhesive** tape. No drilling or mechanical fasteners are

required.

Which cases is it compatible with?

It is compatible with most **Peli Air**, **Protector**, and **Storm** cases. Exact compatibility should be verified based on the specific case model being used.
