

Universal Semi-Rigid First Aid Kit

The **Universal semi-rigid first aid kit** contains all the supplies needed for routine first aid in a compact, easily identifiable container. It is available in **three sizes: for 1 to 5 people, 5 to 10 people, and 10 to 20 people**, with quantities of supplies tailored to each group size.

Made of **fluorescent red PU**, with a **retro-reflective cross**, a zipper closure, and multiple pockets, it is particularly suitable for commercial vehicles, workshops, technical facilities, construction sites, and workstations.

Which first-aid kit capacity should you choose?

The **1- to 5-person** version is suitable for small teams, vehicles, or isolated workstations. The **5- to 10-person** and **10- to 20-person** models have the same size, but the 10- to 20-person version contains more supplies to accommodate a larger group.

Hydroalcoholic solution	2 wipes	5 wipes	7 pre-soaked compresses
5-ml gel water packets	2	5	7
Sterile saline solution, 5 ml	2 doses	5 doses	10 pods
Waste collection bag	-	-	1
First aid booklet in 10 languages	1	1	1

Storage and Transport

The **semi-rigid, waterproof** design protects the contents during storage and transport. The interior pockets make it easy to organize equipment, while the fluorescent red color and retro-reflective cross allow for quick identification of the kit. The **1- to 5-person** version also features a belt loop.

Adapt the kit to the site's risks

This kit covers **common first aid needs**. In an environment with specific risks, the contents may require additional equipment tailored to the activity. On a large site or one consisting of multiple work zones, it may also be preferable to distribute several kits to keep supplies close to users.
