# Universelle Recyclable First Aid Kit for 5 to 10 People

The **Universelle First Aid Kit for 5 to 10 people** allows you to store all the necessary supplies for routine first aid in a single container. It includes, among other items, bandages in various sizes, sterile gauze pads, adhesive tape, protective gear, and products for cleaning or first aid.

Its rigid **polypropylene** case, **blended with 30–40% wood flour**, can be mounted on a wall bracket or carried using its handle. Inside, the compartments help organize the various items and make it easier to locate supplies quickly.

## A Wall-Mounted and Portable First Aid Kit

The **wall mount** allows the kit to be kept in a designated, easily accessible location in a workshop, office, or workplace. The handle also makes it possible to remove the kit from its mount and carry it to the area where first aid needs to be administered.

The clip closure keeps the kit secure during storage or transport. Its dimensions of **250 × 190 × 90 mm** allow it to hold supplies for **5 to 10 people** in a container that remains easy to handle.

## Organization of First Aid Supplies

The compartmentalized storage system allows you to separate the various supplies and **see the contents at a glance** when you open the kit. This organization also makes it easier to conduct periodic checks of the supplies to identify items that have been used or need to be replaced.

## Adapt the supplies to the site’s risks

This kit meets **common first aid needs**. When the activity involves specific risks, additional equipment may be necessary. The kit must also remain in a designated location that is easily accessible to users.
