Universal Bleeding Control First Aid Kit

The **Special Bleeding Control First Aid Kit** combines standard first aid supplies with equipment specifically designed for **treating cuts and bleeding**. It includes, in particular, a **tourniquet with a marker**, a sterile pressure bandage, and a self-adhesive bandage, along with bandages, sterile gauze pads, cleaning products, and other first-aid supplies.

Its compact design allows you to keep all the necessary supplies for common injuries and various compression options in a single kit, ensuring you have the right equipment on hand quickly, no matter the situation.

A kit designed for managing bleeding

In addition to supplies for minor cuts and common injuries, this kit includes several **compression and wound protection** options. The tourniquet is provided with a marker, while the sterile compression bandage and self-adhesive bandage round out the equipment available when compression is needed.

The inclusion of sterile gauze pads, elastic bandage, adhesive tape, gloves, and cleaning products also provides the necessary supplies to protect the affected area and perform initial first aid.

Storage and Identification of Supplies

The **semi-rigid, waterproof** design protects the contents during storage and transport. The interior pockets allow you to separate the various items and quickly locate the supplies you need as soon as you open the kit.

The **fluorescent red color**, combined with the **retro-reflective cross**, makes it easy to spot among other equipment in a workshop, vehicle, or workstation. Its handle also makes it easy to carry to the area where first aid is needed.
