Multipurpose Rigid Plastic First Aid Kit for 2 to 4 People

The **Multirisques First Aid Kit for 2 to 4 People** is a compact solution for equipping small teams, offices, workshops, or isolated workstations with the essential items needed for routine first aid.

Its contents are specifically designed to treat **minor cuts, superficial wounds, light bleeding, minor bumps, and eye splashes**. The entire set is housed in a rigid white ABS case designed for wall mounting.

A Compact First Aid Kit for Small Teams

Measuring just **185 × 130 × 75 mm**, this kit can be easily installed near a workstation without taking up much space.

Its **ABS**(acrylonitrile butadiene styrene) shell forms a rigid container designed to protect and organize the various first-aid supplies.

The kit comes with a **wall mount, along with the screws and anchors needed for installation**. This compact version does not include a carrying handle.

Technical Specifications

Multi-Purpose First Aid Kit for 2 to 4 People

70° alcohol wipes	3
Drying lotion compresses	3
Waterless hand sanitizer	2 packets
Sterile saline solution	2 doses
First aid booklet in 10 languages	1

A kit specifically designed for minor wounds

The kit includes **14 adhesive bandages in two sizes**, along with 4 individual sterile gauze pads.

A **sterile pressure bandage** is also included for situations where bleeding requires more pressure than a simple adhesive bandage can provide.

Tapes and Securing Materials

Two elastic bands of different widths and a roll of adhesive tape help keep a gauze pad or bandage in place.

A pair of 12-cm scissors, a splinter remover, and a pair of disposable gloves round out the accessories needed for common first aid.

Cleaning and Care for Minor Injuries

The kit includes **chlorhexidine cleansing pads**, 70° alcohol pads, drying lotion pads, and calendula pads for minor bumps.

Two packets for waterless hand hygiene also provide a cleaning solution before administering care.

Two single-use doses of saline solution

The kit contains **2 single-use doses of sterile saline solution**, which can be used for occasional rinsing in case of small particles of dust or superficial splashes in the eye.

A size suitable for isolated workstations and small spaces

Its compact size makes it ideal for **offices, small workshops, technical rooms, stationary vehicles, or isolated workstations** where a large supply is not necessary.

Thanks to its wall mount, the kit can be installed in a designated location that is easily accessible to users.

Check the contents regularly

The contents of the kit must be checked periodically to replace any used, damaged, or expired supplies.

This check ensures that the kit remains fully stocked and immediately available when an incident occurs.
